

Google Sheets

⇒ CONNECT | INTEGRATION OVERVIEW

## GET MORE CONTROL OVER YOUR DATA WITH GOOGLE SHEETS

### AUTOMATE DATA COLLECTION AND SPREADSHEETS

Google Sheets is a free online spreadsheet app that lets you create and format spreadsheets and work with other people. We teamed up with Google Sheets so that you can easily get your data out of LeagueApps and distribute it throughout your business—no CSV download or manual effort needed.

#### HOW THE INTEGRATION WORKS

In the LeagueApps Management Console, admins select the program they want to integrate with Google Sheets. Then, registration and program data are automatically pushed from that program to the assigned Google Sheet. The sheet auto-syncs every 30 minutes or can be updated instantly with an easy, manual refresh.

### WHY CLUBS LOVE GOOGLE SHEETS

#### COLLABORATE WITH YOUR TEAM ANYTIME, ANYWHERE

Access, create, edit and work with others on spreadsheets from your phone, tablet, or computer—even when there's no internet connection.

#### GET REAL-TIME INSIGHTS INTO YOUR BUSINESS

Google Sheets updates instantly as you make changes, ensuring your team is always working with fresh data.

#### KEEP YOUR DATA SECURE

Built on top of Google's infrastructure, Google Sheets gives you the freedom to create and collaborate, while keeping your information safe and secure.
